4 out of 5 stars

International Creator: European addiction prevention network Last reviewed:

18/12/2017

Review: A network with representation from 18 European countries. Coordinates a range of projects and information exchange to develop more effective prevention initiatives to protect young people, parents and the broader community against issues which are caused by addiction or alcohol and other substances misuse. Member organisations can access guidelines, jointly developed policy, strategies and other community health curriculum, regular working meetings and the exchange of information and materials. Non-European based professionals can access a collection of pdf downloads at no cost.

3 out of 5 stars

Europe Creator: European Drinks Industry

Last reviewed: 04/03/2019

Review: A database of public health alcohol harm reduction campaigns created by the European alcohol industry. The initiatives address underage and binge drinking, drink driving, responsible service, workplaces, pregnancy and strategies to support prevention campaigns. Provides overviews of different initiatives in different countries. Could be useful for public health professionals to compare international approaches to alcohol harm reduction.

2 out of 5 stars

Europe Creator: European Institute of Studies on Prevention (IREFREA) Last reviewed: 26/09/2018

Review: A research institute with a network of European experts specialising in drug prevention and drug demand reduction. Access to publications, project outlines and seminars in Spanish and English. Excellent debates about the potential for encouraging social change to recreational nightlife activities to prevent harms for young people who are clubbing; prevention and early intervention strategies to reduce alcohol related violence; and multicultural family issues.

Review: Researchers working together to address the impacts on the social, psychological, and mental health developments of youth who engage in binge drinking or drinking of alcohol generally. The consortium aims to develop best models for understanding the impact of alcohol on teenage maturation. The consortium intends to provide an evidence-base to contribute to the development of policies, prevention strategies, health promotion campaigns, and treatment interventions to reduce harms associated with underage drinking. Links are provided to abstracts of published materials. This site is useful for tertiary students, professionals and researchers.

[50. ReachOut Professionals - ReachOut.com](#)

<http://au.professionals.reachout.com/> [Tweet](#)

5 out of 5 stars

Australia Creator: ReachOut Australia Last reviewed: 22/03/2019

Review: A comprehensive site for teachers, counsellors and professionals working with young people. Focuses on prevention, early intervention and the development of positive mental health and health promotion. Includes online resources, information, assessment tools, curriculum materials, access to professional development and e-news. New apps for students and teachers regularly being developed and promoted via the site. While many of the resources can be viewed online, it is necessary to register as a member to be able to download some materials.
